

My husband & myself have consulted Master Ricky Chua for the past 7 years. We usually consult him on my husband's career which has many obstacles over the years. Fortunately, with Master Ricky Chua's advises, my husband was able to persevere on in his job & got promoted eventually.

In 2006, we were looking for a new home. As usual, we consulted Master Ricky Chua's advises on the facing of the house etc. After numerous viewings with Master Ricky Chua, we finally found a house which is suitable for the whole family. We have 2 young children, age 3 & 5. But Master Ricky Chua warned us that in the year of the Rat & Horse, this house will not be good for me. I will suffer some health issues like heart problem, high/low blood pressure or eyes infection. I took his warning lightly mainly because I like this house so much. I soon forgot about his warning. We soon moved in and enjoyed peace & harmony. My husband's career went well too.

The moment we ushered in the year of the Rat, in first week of March, I suffered from sudden heart palpitation. It got so bad that my husband has to get an ambulance to send me to the hospital. I was feeling numb. After thorough checks from doctors from 2 hospitals, blood tests, X-rays, ECG tests & treadmill tests. The doctors couldn't give me a diagnosis. There was nothing wrong with my heart. I have 2 more attacks on separate occasions accompanied with dizziness. All the attacks happened at home. All these lasted for a month. And that's not the end of it.

One week later in April, I woke up with a very bad eye infection. I've never suffered any eye infections before as I don't wear contact lenses. After visiting 2 GPs, I recovered 10 days later.

3 days later, I was down with a bad throat infection which lasted for 2 weeks. This infection was so bad that strangely it was not accompanied with any other flu symptom. I was woken up mostly every night because of the pain from the throat. After visiting 2 GPs, 1 Chinese Sinseh, I went to see an ENT specialist who did a scope to make sure that it's not tonsils. I was given a very strong dose of antibiotic & soon recovered.

After recovering from my bad throat, I was wondering what could be next. I never felt so sick in my life before. Moreover these illnesses were all new to me, I never had them before in my life. As I am full time housewife at home with the kids with no maid to help out, I was really desperate to get my health back. I suddenly remembered Master Ricky

Chua's warnings about my poor health in the year of the Rat. Heart problem, low blood pressure & eye infections, so strangely it all happened to me. During my last visit to the cardiologist, the doctor mentioned that the palpitation could be due to some electrical fault in my heart. I soon suspected that it could be due to some bad energy flowing in our house that resulted in my poor health. I soon contacted Master Ricky Chua and shared with him my health problems during the past months. I told him that his analysis all came true. Master Ricky Chua then visited our house & advised us to remove the water feature & placed a 'qi ling' outside our house. He also did some blessings to our house.

One month had passed, I am up & perky to my old self again for the past 3 weeks. I hope that these illnesses will not plagued me again.

Thank you so much Master Ricky Chua!

With Regards,

Ms Petrina Lum
